

Play of Time

survey „Play of Time“ as base for the performance project „Momo Upcycled“

www.danawolter.de

Imagine an ecological basic income is implemented ...

**How would you design a sustainable living together
of human being and nature on planet earth?**

Imagine a basic income * financed by eco taxes
is implemented and let's call this money
a time coupon – a gift of life time!

How would you create your lift time with
such a time coupon in resonance with yourself,
your fellow men, nature and next generations?

**Become part of this project and design
with us the required cultural change!**

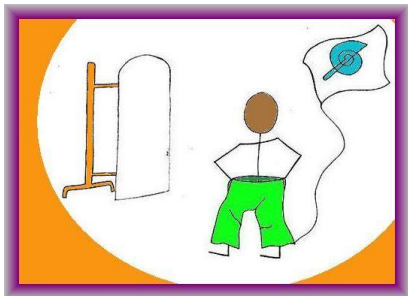

Please move through the survey and select
on each of the 13 life areas one of the mentioned proposals.

You will find information for each life area below the respective proposals.

**Thanks for your impact on an intelligent design and
creation of good life for us and future generations.
So that we hopefully could handle the future challenges
on the little earth in a playful way!**

* means the universal, individual, unconditional
and sufficient covering demand transfer of money

clothing

I buy my clothes second hand and new.

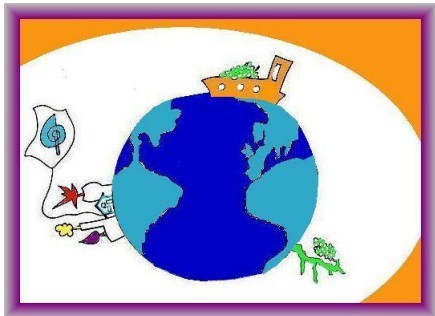

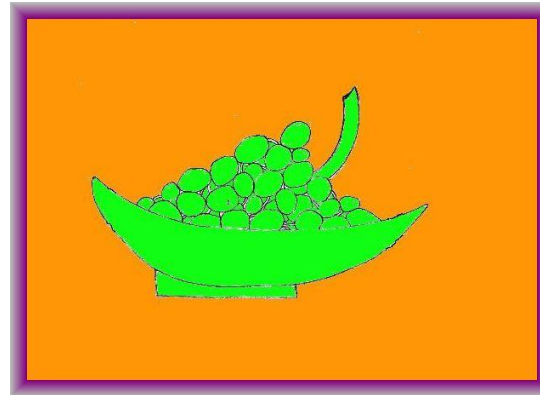

I make my clothes by myself.

I swap, share and loan my clothes.

information: With the time coupon you finally can learn how to sew or you visit one of the next rags swap party near to you – so your „new“ pants will celebrated immediately! And if you like to go shopping, then you will exchange quickly vested your time coupon there. In an intelligent design all clothes are so eco-effective produced that they can be traced back into the closed circuits of biological and technical metabolism. Tomorrow your pants will be organic fertilizer or countless times reused ...

nutrition

I buy my food from global producers.

I buy my food from local producers.

I produce my food by myself.

information: With the time coupon you can grow the own food on the balcony, in the kitchen and in common gardens. A sustainable nutrition is poor in animal products and based with creative cultivation methods in intelligent circuits on eco-farming and local agricultural output. Your consumption of resources increases with the transport of food over long distances and even without ambitions in gardening: with time get your bike and know about where your food comes from!

habitation

I live suburban.

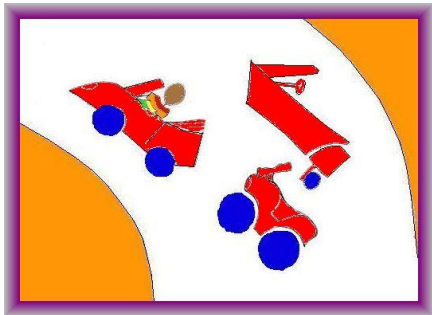

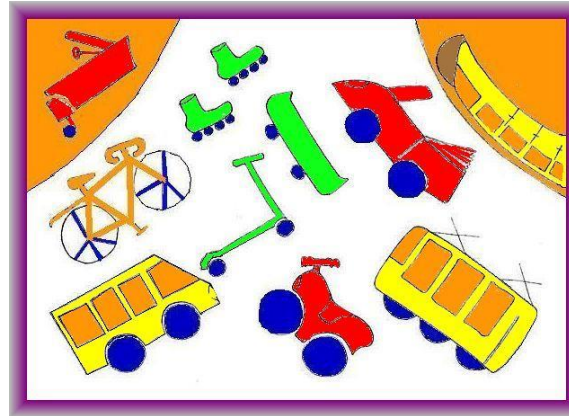

I live urban and alone.

I live urban and in common.

information: Clean future cities offers you with renewable energies and architecture corresponding to circuits what is required for a good life and with your time coupon you can enjoy it! Because to overcome long distances increase your consumption of resources and time. It makes much more fun to use this time for house and neighborhood projects and to spare natural resources by sharing drill, mixer and rubber boat.

mobility

I move myself alone and fast.

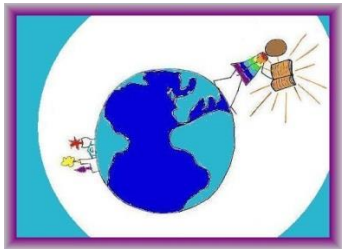

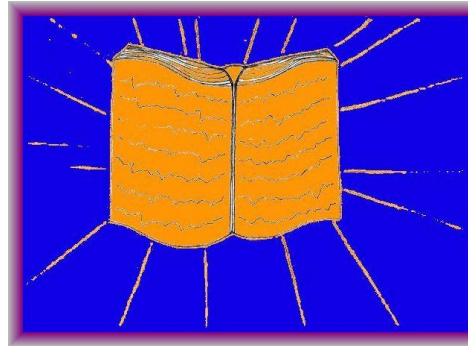

I move myself alone and slow.

I move myself in common and slow.

information: With time coupon and skateboard through the city! Because only walking consumes fewer resources in a world of smart connected mobility without fossil fuels, eco-leasing and gratis public transport. Move yourself with time, by shared mobility and with leisure in train and ship on a long trip – your health and nature thank you!

education and research

I educate myself and research by travelling.

I educate myself and research alone and in own space.

I educate myself and research in common spaces and in networks.

information: With time and free access to knowledge for everybody you can educate yourself lifelong, generate new ideas and experimentalize! The time coupon offers you the scope for self-determined learning with the required attention. Because education and research for an intelligent design are time-consuming and the future challenges are only to handle in teamwork of all. Through their free character these immaterial goods are linked to people with their specific skills and cannot be measured completely and in advance in their quality and scale. Equality of educational opportunity with integrated and practical models make a society of knowledge possible, which knows to adapt itself smart on changes. With smart technologies, sustainable learning contents and creative research methods is an evolutionary development jump possible, for which the earth has taken over millions of years a lot of time!

creativity, art and culture

I visit art and culture, but I am not artistic and creative active.

I am artistic and creative active alone and in own space.

I am artistic and creative active in common spaces and in networks.

information: With the time coupon you can contribute with the free play of your ideas to an intelligent design! To create the living together on this planet sustainable, development and proving of innovations are required in all areas of society. These creative trials are time-consuming and have a strong relation aspect. The time coupon ensures the free character of creative and artistic expression, which cannot be measured completely and in advance. Artistic activities and cultural participation are required needs and their diversity is expression of social prosperity. As immaterial goods support art and culture required social transformations and provide the base for a cultural change. In smart connected networks you can spare resources and create the change with all senses!

relationships

My partner, friends, family and nature are not nearby me and I need to overcome a big distance to be with them.

My partner, friends, family and nature are not nearby me and I need to overcome a distance to be with them.

My partner, friends, family and nature are nearby me.

information: Time for friends, family, for yourself and in nature – with the time coupon into happiness! Succeeding and stable relationships are time-consuming and satisfy the needs security, friendship and health. With self-determination, respect, leisure and harmony with nature your wellbeing and this of your fellow men is supported thereby, how satisfying the access to this immaterial good is possible. The time coupon assists the adaption to changes of living conditions and ensures the individual liberty through the protection of the bare existence and dignity of every human being. For the compliance of human rights and for a regardful handling of human being and nature are social innovations and global cooperation required, so that social eco-effectivity and equality of opportunity can be lived on this planet throughout all generations. Peace and solidarity for all human beings on earth – with the time coupon for a fair world!

codetermination

I codetermine my living and working conditions, and vote.

I codetermine my living and working conditions, vote and take part in local **or** global decision-making.

I codetermine my living and working conditions, vote and take part in local **and** global decision-making.

information: You determine how a peaceful and fair future world should look like! With the time coupon you can inform yourself, discuss your opinion and make responsible decisions. Whether in job, district or in global engagement – grassroots democracy and consensus orientated decisions are time-consuming and the early experience of codetermination supports you thereby. For an intelligent design based on equal and free rights your participation is required and through smart technique your time is the only decisive resource for this immaterial good. Transparency and factual differentiated information support you in a vital dialog for required social and economic frame conditions and in anticipatory action. Nonviolent, with fun and democracy into a moved cultural change!

reproduction

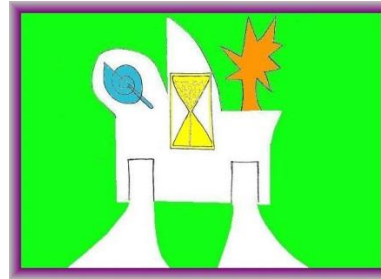

Household chores, care work of my fellow men and nature
I let do by others as much as possible and pay for.

I do in common and
in networks.

information: With the time coupon you can create the required and recurrent care work for you and others by yourself! Assistance of children and relatives, maintenance of nature and household chores are time-consuming and the value as the quality of care work cannot be measured completely and in advance because of interpersonal relationships. The time coupon records all the actions, which are not based on exchange and return service, because a pure economic treatment leads to depreciation of this immaterial good and undermines the individual liberty. In an intelligent design is care work fair partitioned between all members of society and upgraded, because its quality mirrors the general and individual prosperity. This for the social cohesion required voluntary engagement receives as a cultural fundament with the time coupon finally an economic acceptance!

gainful employment

I spend a lot of time with gainful employment.

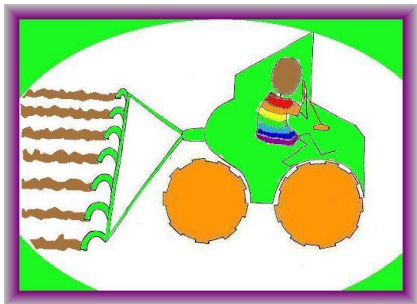

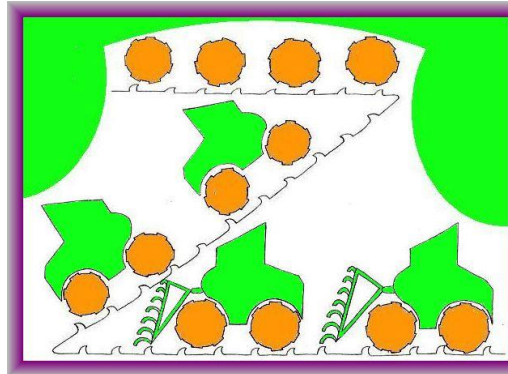

I spend part of my time with gainful employment.

I spend no time with gainful employment and the basic income covers my demand of money.

information: To choose free, with how much and which gainful employment you create your life time – with the time coupon is this possible! When your basic demand of money is covered sufficient, your request for wise and satisfying action decides over your time. In an intelligent design you can adapt yourself on changing living and working conditions without existential fear and as human being with cultural competence you know how to act appropriate on necessities of society. Quality of life and prosperity supports the common good balance sheet with an eco-social evaluation of products and services, so that in local economic circuits and creative value creation chains fair conditions can be lived by everybody. Time for the immaterial goods education & research, art & culture, relationships, codetermination and care work is thereby the key for a sustainable living together of human being and nature on earth. With the time coupon you can live social eco-effectivity with liberty, equality and serenity!

industrial automation

I use products of industrial automation alone.

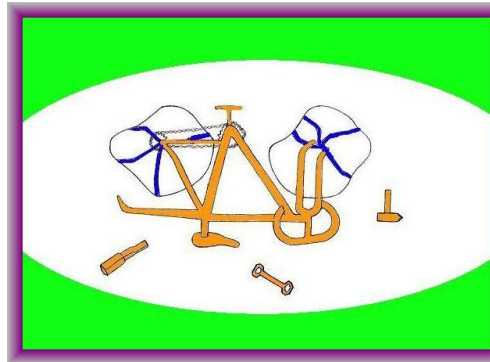

I use products of industrial automation in common and in networks.

I use no products of industrial automation.

information: Wash laundry, brew coffee, dig over – the machine makes it! Digitization, robots and automation take over routine actions, facilitate work and give you thereby time. In an intelligent design products of industrial automation will effective optimized by smart production, sharing out and use, in order to reduce their consumption of resources. These material goods are produced corresponding to circuits and modular on places with short production chains, to will be used sustainable transported in creative designed networks. And with your time coupon you can also build together a tractor by yourself!

repairing

I do not repair by myself, pay others for doing it or buy new.

I repair by myself and in own space.

I repair in common and in networks.

information: With the time coupon you can make yourself more independent with self-acting and cooperative subsistence. For that required mechanical skills and manual improvisation aptitude you can learn by doing with time and practice. In makerspaces, fablab's, repair-café's and networks you receive valuable tips and in the exchange of experience can affinities and talents complement one another wise. To make with maintenance, repairing, rebuilding and own production manufacturing processes accessible for oneself and to determine the useful life of articles of daily use by you, spare in an intelligent design natural resources. With artistic and mechanical actions you are getting active for your personal sovereignty and creative self-efficacy!

sharing

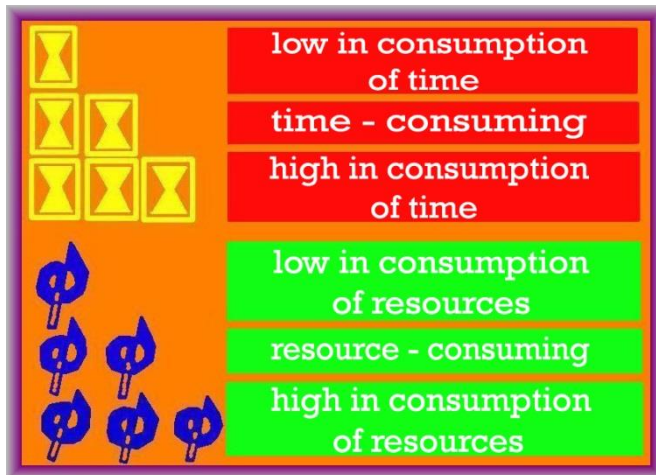

I buy and own instead of live sharing and using open source/access.

I live sharing and use of open source/access in some areas of my life and in a few networks.

I live sharing and use of open source/access in networks and wherever I can.

Information: Time for share & care circle, give-away markets and swap rings! With the time coupon you can reduce in social nets, swap relations and sharing communities the amount of material goods creative and spare natural resources. With time prosperity money becomes in a social eco-effective design cooperation and trust. Create the cultural change intelligent connected and peer-to-peer, with open source and open access to knowledge and decentralized manufacturing processes, with creative commons and do-it-yourself, in order to be in common adaptable and resilient for the future challenges – play with your time for a sustainable living together of human being and nature on planet earth!

You made it!

**Your impact on a creative and intelligent design in time
prosperity results on the selection of your life blue print!**

Your life blue print is composed of your selected proposals
on the 13 life areas, with them you determine over
your consumption of resources and your life time!

(for an example see <https://calendarbygenb.wordpress.com/play/>)
